Option 2 - Compare. So, let's move on to the second option, which is compare. Compare is one of my favorite features in PowerPoint. It sounds a bit confusing, but it actually is really easy to use. If you need to move slides around, PowerPoint has made it easy to adjust the order. This lesson will explain how to re-order your slides and discuss things to consider when you move slides, such as ...

The Biology Project, an interactive online resource for learning biology developed at The University of Arizona. The Biology Project is fun, richly illustrated, and tested on 1000s of students. It has been designed for biology students at the college and high school level, but is useful for medical students, physicians, science writers, and all types of interested people.

1. INTRODUCTION - OVERVIEW - Biology as a science deals with the origin, history, process, and physical characteristics, of plants and animals: it includes botany, and zoology. A study of biology includes the study of the chemical basis of living organisms, DNA. Other related sciences include microbiology and organic chemistry.
