Get fast answers for your Cadillac questions. The Experts on Just Answer have handled thousands of Cadillac questions, including: I have a 2004 CTS Cadillac that won't start, and the key won't come out of the ignition. I am looking at buying at buying at Caddy and I dig the style of 74 Eldorados. I a little hesitant on buying a car, just to have it die on me. Are there certain problems I should watch out for with this model? Any engine/transmission choices I should avoid? I'm fairly mechanically inclined and have ...The 68 and 69 DeVille bodies are different and so I don't think this will work. The 69-70 bodies or 67-68 bodies are similar and those years could interchange. Ill second that, door switches with all the associated water around them are always the first to go. Take each one out in turn and disconnect the wire or hold them off the metal to see if your light gos out, as Glen said the lights have power all the time and are grounded to the body through these switches, chances are ones stuck in.
