

Download Caterpillar Owners Manual 247b

Thanks to you both for your replies. The snowblower is rated for 24 to 42 gpm, so the loader's 26.2 high flow rate should be appropriate. I've double-checked the connections according to the manual and they are correct....there is no other way for it to be hooked up, and the manufacturer is familiar with Cat hookups. It should be a piece of rectangle tube steel, I've swapped some axles on one before and it was just 1/4" or 3/8" wall tube steel. Looking on Cat Parts it looks like the part number is 252-0440 which was replaced by # 305-9300, shows price is about \$1,600. Enclosed Cab, Heater, Auxiliary Hydraulic Plumbing, 13" Track Belts, Manual Coupler, 68" General Purpose Smooth Edge Bucket, Ultra Low Sulfur Diesel Search. Barcelona - Spain
