Circles - GMAT Math Study Guide. Table of Contents. Definitions; Properties of a Circle. Formulas for Circles; ... Related Study Guides. The circumference of a circle is the distance all the way around the circle. It's the same as the perimeter, but a special word that we only use for the perimeter of a circle. The circumference is always equal to twice the radius of the circle times π (pi), or $2\pi r$... Geometry SOL G.11 G.12 Circles Study Guide Page 2 o Sector area formula: $\frac{1}{2} r^2 \theta$, where θ is the central angle of the arc in degrees o The equation for a standard circle is $(x - h)^2 + (y - k)^2 = r^2$, where (h, k) is the center of a circle and r is the radius.
