I have a bad electrical component I think. I need to understand the engine starting and run sequence with all safety switches Parking Brake, Steering handles in locked neutral, seat switch made, PTO switch off. Dunno about the 3400 but the 3410 appears to have a filter screen on the RH side. Its part 030 in the pic attached. However I think this is only delivering oil to the HST and probably does not effect loader hydraulics which have a separate pump and oil lines.
