

# **Download Health Information Systems Architectures And Strategies Health Informatics**

Health Information Technology Foundations offers an overview of healthcare, health information technology, and health information management systems. Canada Research Chair (Alumni) in Health Informatics. PhD (Comp Sc), B. App. Sc (Comp Sc, 1 st Hons), SMIEEE, MACM. Personal Profile: Dr. Carolyn McGregor AM is the Canada Research Chair (Alumni) in Health Informatics based at the University of Ontario Institute of Technology, Canada. The term e-Health (E-Health, eHealth ...) has been in use since the year 2000. e-health encompasses much of medical informatics but tends to prioritise the delivery of clinical information, care and services rather than the functions of technologies. A personal health record (PHR) is a health record where health data and other information related to the care of a patient is maintained by the patient. This stands in contrast to the more widely used electronic medical record, which is operated by institutions (such as hospitals) and contains data entered by clinicians (such as billing data) to support insurance claims.
