Honour, Violence and Emotions in History is the first book to draw on emerging cross-disciplinary scholarship on the study of emotions to analyse the history of honour and violence across a broad range of cultures and regions. The disparate nature of these examples shows how cultural and historical context is essential to historicizing the phenomenon of honour-violence. The collection represents an original and exciting contribution, due to the interdisciplinary approach it adopts – drawing, most notably, on recent scholarship in the history of the emotions.
