

Download Hurricane Manuel Damage

Hurricane Manuel. Upon making its first landfall, Manuel caused extreme flooding in southern Mexico. Property and agricultural damage as a result of the system was widespread, and roughly one million people were estimated to have been directly affected. In Guerrero, 97 people perished, including 18 in Acapulco. Manuel was the first eastern North Pacific tropical cyclone since records began in 1949 to make landfall in mainland Mexico, redevelop over water, and go on to become a hurricane. After a hurricane like Michael, it seems everyone is an expert on hurricane insurance claims. There are public adjustors and attorneys advertising everywhere- many of whom are from outside of our area. :- Message from TripAdvisor staff :- This topic has been closed to new posts due to inactivity.
