The Olympus OM-D E-M5, announced in February 2012, is a Micro Four Thirds compact mirrorless interchangeable lens camera. In style and name it references the Olympus OM series of film SLR cameras, but it is not an SLR camera (there is no optical path from lens to viewfinder: a high quality electronic viewfinder is used). The successor is the Olympus OM-D E-M5 Mark II.

The Olympus OM-D E-M10 is the third camera in the company's OM-D range and represents another tier in the lineup - sitting below the E-M5 and the even more expensive E-M1. It uses the same 16 megapixel Four Thirds sensor as the E-M5, though doesn't offer that camera's weatherproofing.
