

Download Red Cross Oxygen Administration Guide

Oxygen is the chemical element with the symbol O and atomic number 8. It is a member of the chalcogen group on the periodic table, a highly reactive nonmetal, and an oxidizing agent that readily forms oxides with most elements as well as with other compounds. By mass, oxygen is the third-most abundant element in the universe, after hydrogen and helium. At standard temperature and pressure, two ... American Red Cross (ARC) - Administering Emergency Oxygen program provides the knowledge and skills necessary to provide care to a victim of a breathing emergency using breathing devices, including resuscitation masks, bag- valve mask resuscitators and Note that this is a guide only. You must follow your hospital guidelines. Inform the Blood Service of any adverse reaction that may. relate to the quality of the product which will prompt the Blood Service to recall any associated products, eg transfusion transmissible infection, and TRALI; or; cause an alternative product to be requested eg washed red cells in patients with repeated ... Blood is a body fluid in humans and other animals that delivers necessary substances such as nutrients and oxygen to the cells and transports metabolic waste products away from those same cells.. In vertebrates, it is composed of blood cells suspended in blood plasma. Plasma, which constitutes 55% of blood fluid, is mostly water (92% by volume), and contains proteins, glucose, mineral ions ...
