The RSLogix 5 programming package is compatible with programs created with Rockwell Software DOS-based programming packages for the PLC-5 processors. Hi, I am working on a system where i want to be able to load default values into alarm levels before each run of the process. Is there a way to have the values in an array and have the locations they need to go in another array and have the AB ladder logic step through the arrays to set the values, instead of having a rung for each alarm level.
