

Download Uterine And Embryonic Factors In Early Pregnancy Reproductive Biology

Making sense of equine uterine infections: The many faces of physical clearance
Factors and Hazards of Infant Development
There are many factors and hazards that can influence an infant's development even before birth. Pregnancy is a very important event in a woman's life. There are many feelings and excitements that affect a pregnant woman's head.
female reproductive apparatus; internal female genital organs / organa genitalia feminina interna : the various organs in the female that are concerned with reproduction; adnexa uteri; epoöphoron / epoophoron / corpus pampiniforme / pampiniform body / parovarium / Rosenmüller's organ: a vestigial structure associated with the ovary, consisting of a more cranial group of mesonephric tubules
...Prenatal development (from Latin natalis, meaning 'relating to birth') includes the development of the embryo and of the fetus during a viviparous animal's gestation. Prenatal development starts with fertilization, in the germinal stage of embryonic development, and continues in fetal development until birth.. In human pregnancy, prenatal development is also called antenatal development.
